Our goal at TW has always been to create high quality products in compliance with requirements we consider to be mandatory when working with an element as important as Water.

Water is first and foremost a food. For this reason we believe it is imperative to guarantee utmost reliability. With this in mind, we wanted to reinforce the value of our product certification through a third-party and independent certifying body such as ICIM, the Italian Certification Institute for Mechanics. The company decision to certify our products was the result of the desire to inform consumers of the high quality of think:water filters and osmosis systems.

Water.

The term water implies the ICIM certification applicable to 9 legal guidelines resulting from ministerial, legislative, presidential decrees and EU directives (*see extract of regulations*). **Among these, the most important Ministerial Decree 174 for materials and objects that can be used in fixed systems for the treatment of water intended for human consumption and consequently Ministerial Decree 25.**
